

# CHEM SCREEN

**Utilizing your down hole rod pump or plunger lift to deliver Chemical Pellets where it needs to be.**

**Artificial  
Lift  
Intake  
area**

The Chem Screen is the latest development for a down hole screen application. In combination with your local chemical company. It is now possible to deliver slow release chemical pellets to the area and place where you need it most No longer do you have to guess and wonder if your chemical has reached the specific area in need of treatment. A slow continuous feed approach is often the treatment mode of choice for down-hole well bore chemical treatment.

**Chemical  
Pellets  
Storage  
area**

| <b>AVAILABLE SIZES</b> | <b>FLOW AREA</b> | <b>CHEMICAL STORAGE AREA</b> |
|------------------------|------------------|------------------------------|
| <b>1" X 8' OAL</b>     | <b>2 FT.</b>     | <b>6 FT.</b>                 |
| <b>1-1/4" X 8' OAL</b> | <b>2 FT.</b>     | <b>6 FT.</b>                 |
| <b>1-1/2" X 8' OAL</b> | <b>2 FT.</b>     | <b>6 FT.</b>                 |
