

# TUBING CHEM SCREEN

No-Flow Nipple

**Utilizing your down hole rod pump or plunger lift to deliver Chemical Pellets where it needs to be.**

The tubing **Chem Screen**, in coordination with your local chemical company, can mix and match the right combination of slow released pellets for your application. The **Tubing Chem Screen** can be ran in most tubular applications.

**ESP, PC, Gas Lift, Plunger lift. Rod pump, Jet pump, Hydraulic pump and Flowing wells.**

No Longer do you have to guess and wonder if your chemical has reached the specific area in need of treatment. A slow continuous feed approach is often the treatment mode of choice for down-hole well bore chemical treatment.
